EDUCATION

Specialization: IT Technician

ZST im. Hipolita Cegielskiego

📅 09/2015 - 04/2019   📍 Piła

SUMMARY

3+ years of experience crafting user-centric web applications across diverse international teams. Skilled in building both SPAs and complex server-side rendered pages using Vue.js and its ecosystem, with a passion for building accessible and performant user interfaces. Convinced that collaboration is key to successful development.

EXPERIENCE

Frontend Developer

Monterail sp. z o.o   `OFFICIAL VUE PARTNER`

📅 05/2022 - 03/2024   📍 Wrocław/remote

- Developed and maintained cross-platform (web, iOS, Android) and server-side rendered (SSR) applications using Vue.js.
- Built interactive user interfaces, implementing complex functionalities, and utilizing robust debugging techniques.
- Optimized performance by reducing bundle size for faster load times, and applied responsive design for consistency across diverse devices and browsers.
- Collaborated and communicated effectively with international teams implementing Scrum, including programmers (FE, BE), designers, testers, and clients.
- Enhanced SEO by optimizing structure, addressing duplicate content, and implementing relevant meta tags based on comprehensive audits.
- Ensured web content accessibility for people with disabilities, achieving WCAG 2.0 AA compliance.
- Performed daily code reviews and implemented unit tests to ensure code quality

Vue Bootcamp

Monterail sp. z o.o   `OFFICIAL VUE PARTNER`

📅 02/2022 - 05/2022   📍 Wrocław/remote

- Developed a single-page application (SPA) based on specifications and Figma design using Vue.
- Participated in daily meetings covering key software development aspects like technological debt, accessibility, SEO, etc.
- Collaborated with experienced developers and whole team on a real-world project during a 2-week shadowing period.

Intern Javascript

Auroria sp. z o.o

📅 03/2020 - 03/2021   📍 Poznań

- Developed e-commerce platform and an offers comparison tool using Vue.js.
- Constructed a Node.js API (Express), extracting product offer details using web scraping techniques.
- Built a warehouse admin panel with Vue Component Framework (vuetify).
- Documented code using comments, detailed README file, and structured API documentation to ensure clarity, maintainability, and ease of collaboration.
